## 九九を超えた かけ算 ②

1 例を見て、かけ算を しましょう。

例  $12 \times 2$

$$= \boxed{9 \times 2} + \boxed{3 \times 2}$$

$$= \boxed{18} + \boxed{6}$$

$$= \boxed{24}$$

例  $3 \times 16$

$$= \boxed{3 \times 8} + \boxed{3 \times 8}$$

$$= \boxed{24} + \boxed{24}$$

$$= \boxed{48}$$

①  $12 \times 4$

$$= \boxed{\phantom{00}} + \boxed{\phantom{00}}$$

$$= \boxed{\phantom{00}} + \boxed{\phantom{00}}$$

$$= \boxed{\phantom{00}}$$

②  $6 \times 16$

$$= \boxed{\phantom{00}} + \boxed{\phantom{00}}$$

$$= \boxed{\phantom{00}} + \boxed{\phantom{00}}$$

$$= \boxed{\phantom{00}}$$

③  $15 \times 7$

$$= \boxed{\phantom{00}} + \boxed{\phantom{00}}$$

$$= \boxed{\phantom{00}} + \boxed{\phantom{00}}$$

$$= \boxed{\phantom{00}}$$

④  $9 \times 14$

$$= \boxed{\phantom{00}} + \boxed{\phantom{00}}$$

$$= \boxed{\phantom{00}} + \boxed{\phantom{00}}$$

$$= \boxed{\phantom{00}}$$

2 かけ算を しましょう。

①  $6 \times 12$

②  $9 \times 13$

③  $4 \times 11$

④  $7 \times 16$

3 かけ算を しましょう。

①  $14 \times 8$

②  $15 \times 5$

③  $12 \times 8$

④  $16 \times 3$
