# 分数のたし算

## (分数と小数)

1  $\frac{13}{10} + 0.4$  を計算しなさい。

$$\textcircled{Y} \quad \frac{13}{10} + 0.4 = \frac{13}{10} + \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$\textcircled{I} \quad \frac{13}{10} + 0.4 = \boxed{\phantom{00}} + 0.4$$

$$= \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$= \boxed{\phantom{00}}$$

2  $\frac{9}{20} + 0.7$  を計算しなさい。

$$\textcircled{Y} \quad \frac{9}{20} + 0.7 = \frac{9}{20} + \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$\textcircled{I} \quad \frac{9}{20} + 0.7 = \boxed{\phantom{00}} + 0.7$$

$$= \frac{9}{20} + \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$= \boxed{\phantom{00}}$$

$$= \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

3 次の計算をしましょう。

$$\textcircled{1} \quad \frac{1}{10} + 0.1$$

$$\textcircled{2} \quad \frac{7}{10} + 0.25$$

$$\textcircled{3} \quad \frac{3}{5} + 0.3$$

$$\textcircled{4} \quad 0.2 + \frac{4}{5}$$

$$\textcircled{5} \quad \frac{9}{10} + 0.3$$

$$\textcircled{6} \quad \frac{7}{10} + 0.5$$

$$\textcircled{7} \quad \frac{2}{3} + 0.2$$

$$\textcircled{8} \quad \frac{11}{20} + 0.45$$

$$\textcircled{9} \quad 0.75 + \frac{1}{3}$$

$$\textcircled{10} \quad 0.8 + \frac{3}{7}$$
